Métis Addictions
Council of
Saskatchewan Inc.

Vision

MACSI values our Métis heritage, embraces our future and envisions a world for all people free of the harmful effects of addictions.

Mission

Our mission is to empower individuals to make healthy choices in our communities through a continuum of addictions services, including education, treatment and aftercare to restore a balanced, harmonious, productive lifestyle.

Guiding Values

- ✓ Client-Centred Practice
- ✓ Family Sensitive
- ✓ Holistic View of Health
- ✓ Respect
- ✓ Continuous Learning
- ✓ Partnership
- ✓ Evaluation and Accountability

PROGRAMS AND *Services*

MACSI's programs are unique. They are informed by Métis heritage, traditional Aboriginal teachings, the 12 step recovery model, Saskatchewan's Clinical Principles for Alcohol and Drug Services, research findings and emerging trends in the field of substance addictions. Programs are holistic and designed to support Métis, First Nations and Non Aboriginal people seeking recovery and healing.

MACSI's Prince Albert Centre offers individualized treatment, hope and empowerment through Inpatient Treatment, Stabilization Program, Outpatient Services and community based Field Services for youth and adults. Counsellors work with individuals and families to find the service and support that fits best.

Inpatient Treatment

Inpatient treatment is a 28-day residential option for adults. Inpatient services provide an abstinence-based healing environment where individuals can focus on recovery from substance addictions. Individuals participate in holistic programming, therapeutic group workshops, one to one counselling, educational sessions, self help meetings, cultural teachings,

recreational programming and more. The supportive and structured environment of inpatient treatment fosters a return to a healthier life.

There may be times when a longer treatment stay is needed. When available, additional support is provided to meet more complex needs. This support is short-term, recovery focused and flexible in order to meet unique needs.

Outpatient Services

Many people find a good fit for their needs through Outpatient Services. Outpatient counselling is a helpful approach for those in all stages of recovery as the counsellor can provide addiction screening, assessment, pre-treatment readiness counselling, relapse prevention, after care counselling and community referrals. Outpatient counselling is an effective way for community members to explore how substance addictions may influence their spiritual, mental, emotional and physical well-being. Through outpatient services they will gain the support and tools needed to guide their path to recovery.

Field Services

Through Field Services, MACSI offers holistic, flexible support and promotes principles of harm reduction. Field Services are offered at each MACSI location. In Prince Albert, the Field Educator reaches out to adults, youth and their families in a variety of community settings. One to one counselling and group workshops are commonly delivered in partnership with other agencies. Field Educators are available for presentations to youth and adult audiences.

Stabilization 24-hour Line 306-953-8262

Stabilization is a good option for individuals with complex needs. This support will help establish stability in a safe setting prior to other treatment, when there is risk of relapse or to re-establish healthy living after relapse. Individuals may self refer or be referred by others but must be substance free for 72 hours prior to entry. Participants may stay up to ten days. They will participate in specifically designed group workshops, individual counselling, cultural teachings, recreation and more.

Call MACSI Prince Albert Treatment Centre to learn more about our services and supports.
